PROFILE

I am a self-motivated, tenacious, and ambitious young individual with a dedication to managing and creating beautiful, interactive, and dynamic websites that engage user interaction. I enjoy working in a constantly evolving environment in the tech industry and being part of thriving and developing teams.

With my strong sense of maintaining a diligent and efficient work ethic and creating a productive and organized atmosphere, and with over a year's experience in the software engineering industry, I am willing to offer my capabilities to a team searching for young talent.

EMPLOYMENT HISTORY

Software Engineer Internship, 2U

Cape Town

Aug 2022 — Oct 2022

2U is a platform company focused on delivering high-quality education to learners across the globe. I was first onboarded to 2U as a learner, getting to work with new technologies and gaining experience in the general technology ecosystem.

My main duties revolved around implementing various bug fixes to our react.js application, improving the architecture of our ruby on rails backend applications repositories as well as managing and resolving enhancement queries that would come through our service desk.

Junior Software Engineer, 2U

Cape Town

Nov 2022 — Present

As a result of being retained as a junior software engineer, my responsibilities have vastly expanded, to the point of being the main engineer maintaining and enhancing many of the legacy systems our team owns, but mainly work with the applications responsible for providing a portal for students to gain information about a specific type of course that they are enrolled in.

Additional duties I have garnered include communicating with key stakeholders regarding the student portal applications, leading investigation initiatives around new projects and feature implementations, and leading code mobbing sessions around challenges faced with bug fixes and development issues.

EDUCATION

National Certificate in Information Technology (System Development), Umuzi Academy

Feb 2022

Bachelor's Degree, School of Merit

Dec 2018
